LCS-AMB/B

Hammock structure for better protection

The hammock structure of the LCS-AMB case allows you to easily store your Alpha DSLR camera with the lens attached (not all lenses may fit). This also allows you to easily remove the camera from the case in a more shoot ready fashion giving you a faster response time to shoot if the camera is stored.

Front pocket for easy access

The front pocket is specifically designed to store extra batteries, media, and lens caps.

Versatile carrying options

The LCS-AMB case provides you with 3 carrying options, from the padded shoulder strap, comfortable handle, or convenient belt loop on the back.
